PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of:

Kevin James Kelly, Steven L. Fusco, and
Rumar Indseth

Serial No: 09/874,496

Filed: June 5, 2001

For: METHOD FOR HANDLING
MARKET SURVEYS WITH
HANDHELD COMPUTERS

Group Art Unit: 2164

Examiner: Not Assigned

Atty Dkt No: 1058.07

RECEIVED

JAN 09 2002

Technology Center 2100

CERTIFICATE OF MAIL

I hereby certify that this correspondence is being deposited with the United States Postal Service as First Class Mail in an envelope addressed to Assistant Commissioner for Patents, Washington, D.C. 20231, on the following date: November 1, 2001.

Carolanne M. King

Commissioner of Patents and Trademarks
Washington, D.C. 20231INFORMATION DISCLOSURE STATEMENT

Sir:

- I. Applicants hereby submit an Information Disclosure Statement and enclose a Form PTO-1449 listing reference A1 thru A2 for consideration by the Examiner. A copy of each listed reference is also enclosed.
- II. Applicants hereby request the Examiner to consider each cited reference. As required under 37 C.F.R. § 1.98(a)(3)(i), the following are concise explanations of the relevance of each reference, as they are presently understood:

REFERENCE A1

"Disclosed are a telephone accessory and method of telecommunicating for a personal digital accessory ("PDA"). The PDA includes a chassis of particular dimensions and input/output ("I/O") circuitry on a front surface

01/04/2002 FFANAEIA 00000070-09874496

01 FC:126 180-00-CM
Assignment date: 06/16/2002 Filing date: 01/04/2002
01/04/2002 FFANAEIA 00000070-09874496 00074496
01 FC:126 100-00-CM

of the chassis, the chassis containing processing circuitry coupled to the I/O circuitry. The telephone accessory comprises: (1) a body portion having a concave surface adapted to receive the chassis and first and second body extensions coupled to opposite ends of the body portion and (2) communications circuitry capable of being coupled to the processing circuitry in the chassis when the chassis is received into the concave surface on the body portion, the communications circuitry including a communications transceiver capable of coupling the processing circuitry to remote processing circuitry via a communications link."

REFERENCE A2

"The present invention relates to a communication device for a personal digital assistant (PDA). The PDA mounts within the communication device and the communication device connects electronically to a serial port on the PDA. Through this single serial port, the communication device provides the user of the PDA with access to multiple communication media, such as a telephone modem, a Global Positioning System engine, a packet radio and a cellular telephone. Data from the PDA is directed to a decoder that routes the data to the appropriate communication medium, while data from the communication media are multiplexed onto the single serial interface of the PDA. The communication device also provides a pass-thru serial interface that allows other external devices to communicate directly with the serial port of the PDA. In addition, the communication device can upload software to the PDA that facilitates communications between the PDA and the communication device, and allows the PDA to control the operation of the communication device."

- III. No fees are believed to be due in connection with these materials. This Information Disclosure Statement is being filed prior to receipt of an official Office Action.

Date: November 1, 2001
